

MAGNETAR™

0-0-8

Nutrition Done Different

Magnetar products are cost effective seed and foliar solutions designed to increase yield and improve plant health. Magnetar is a potassium enriched biopolymer that provides essential nutrients that are easily absorbed by the plant.

SEED

Increased yield and the quality of the crop.

LEAF

Higher pod count and fuller pods in pulses. Darker green and more advanced plant stage. Higher brix and increased photosynthesis of the plant.

STEM

Stronger and thicker stems, more even stand. Less lodging.

SOIL

Improved nutrient uptake in sandy soils & improved tolerance in saline soil conditions

ROOTS & RHIZOSPHERE

Promotes root stimulation with an improved rhizosphere. Results in healthier and stronger roots with increased nutrient uptake, water absorption, nitrogen fixation, nodule formation, and stress resistance.

"15 bushel bump on my wheat with one low cost foliar spray"- Ryan Hanson, St. Walburg, Sk

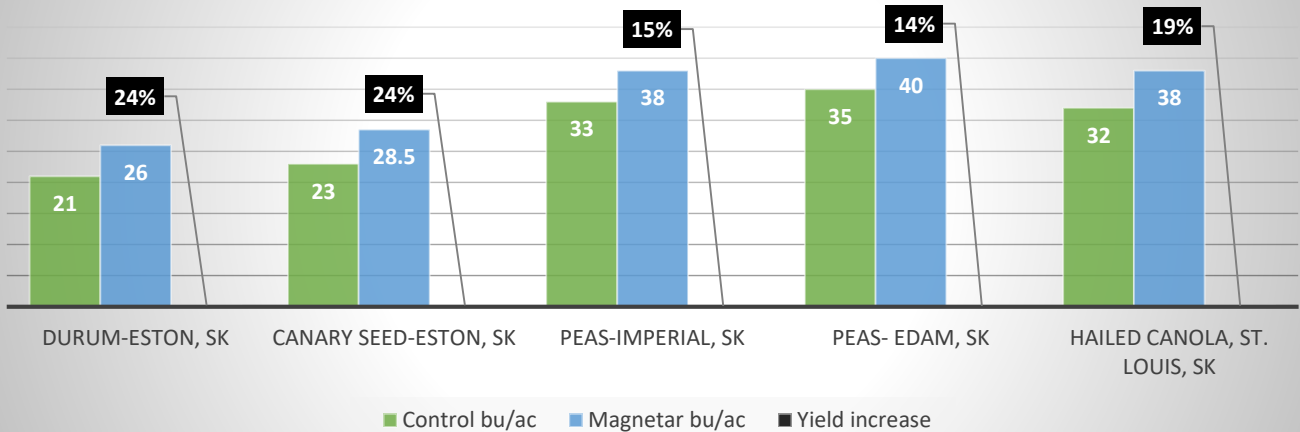

"My peas stood way better with Magnetar leading to a big bushel bump"-Todd Arsenie, Gronlid, Sk
