

Super S 11-0-0-75 Sulphur Trial Results

CIRRUS TRIALS 2018 – SPECIAL-S OXIDATION (Probe Test)

By applying elemental Sulphur in Micronized form, growers can access the in season availability of a Sulphate product while reducing the risk of losses through leaching.

Delivering Sulphur when your crops needs it most ensures you see a return on your fertilizer investment!

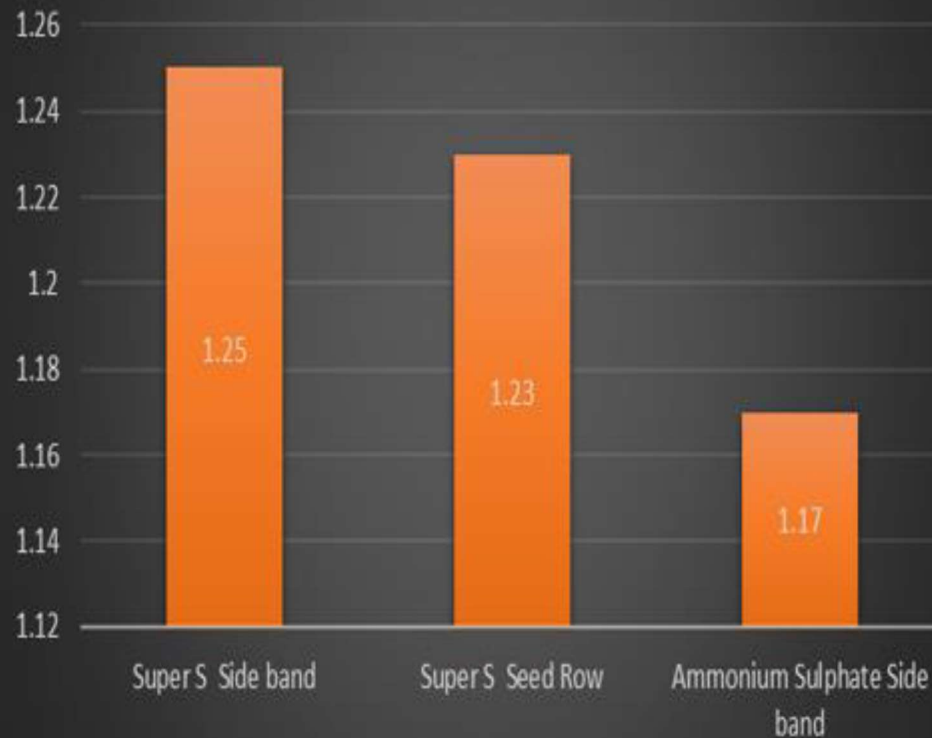

Oxidation test conducted in controlled environment to determine maximum oxidation potential of Special-S. Variable climatic conditions in first 40 days would likely show Special-S availability closer to uptake curves.
