## **NORTHERN NUTRIENTS ANNOUNCES SUCCESSFUL PRODUCTION OF AN INNOVATIVE NEW FERTILIZER**

**SASKATOON, SK - June** - Northern Nutrients of Saskatoon, Canada is pleased to announce the successful production of a new nitrogen sulfur fertilizer that contains nitrogen stabilizers evenly dispersed through out the prill. The 38% Nitrogen and 18% Sulphur fertilizer named Triple Kick also contains a source of carbon, which together with the Sulphur and evenly dispersed stabilizers offers an industry first Nitrogen and Sulphur source designed to limit volatilization and leaching. Northern Nutrients believes that Triple Kick offers a possible solution to

“ With an increased global focus on improving nitrogen efficiency and reducing nitrous oxide emissions, we believe our innovative Triple Kick fertilizer offers a one of a kind solution in the 57 billion dollar global nitrogen market, especially in light of the recently proposed regulation by the Canadian government aimed at reducing fertilizer emissions by thirty percent.” said founder and CEO Ross Guenther. “The initial market reaction to our new product has been phenomenal as we ramp up production for the fall season.”

Triple Kick will be produced in Northern Nutrients enhanced urea fertilizer manufacturing facility outside of Saskatoon, Canada. The facility utilizes the Shell Thiogro technology, a patented process for the incorporation of micronized elemental Sulphur into Urea, resulting in a Sulphur form that is available to plants across the growing season. The same also manufactures Arctic S 11-0-0-75 enhanced Sulphur urea fertilizer which commenced production in April of 2022.

### **About Northern Nutrients:**

Northern Nutrients is a Canadian owned crop nutrition company engaged in the research and development, and manufacturing of environmentally friendly crop nutrition products.
