

THE DUAL NITROGEN STABILIZER

www.northernnutrients.com

WHAT IS LYNX MISSION STATEMENT

LYNX is a Dual Action Urease & Nitrification Inhibitor for Urea & UAN

- On the market since 2019
- Prevents ammonia volatilization, nitrate leaching & nitrification
- Best priced product on the market

**Actual photo from NW Sask retailer*

TECHNICAL FEATURES

Active Ingredients

- NBPT 19%, DCD 19%

Formulation & Application

- Easy to use liquid with efficiency at a low rate
- Fast drying, noncorrosive, with a low odor
- UAN 1-1.5L/1000kg, Urea 1.5-2.0L/1000kg

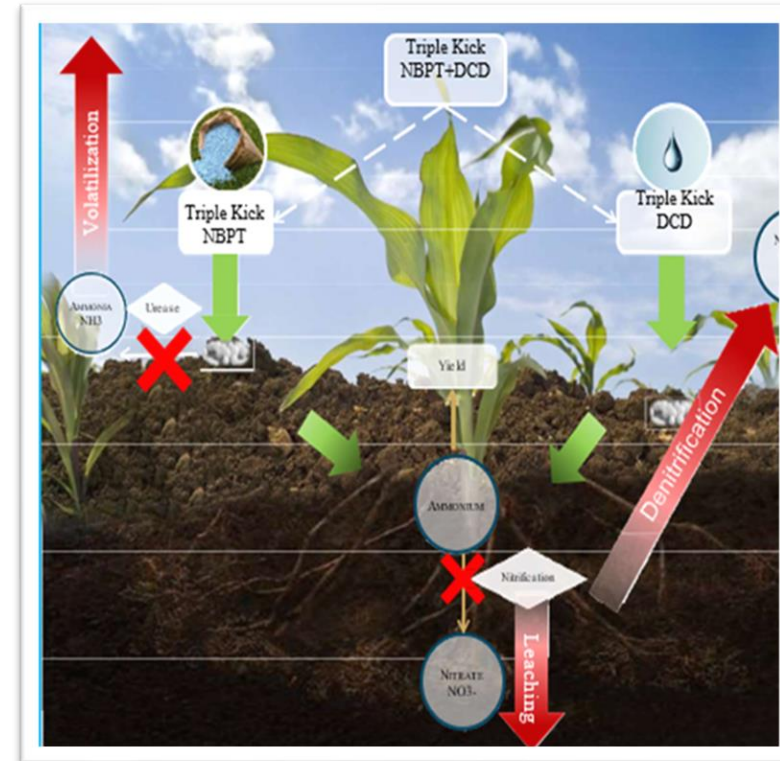

**West Central Sk Retailer coating urea in 2020*

HOW IT WORKS

- NBPT minimizes urease enzyme activity, which slows the conversion of urea to ammonia gas
- DCD competes with ammonia to occupy the AMO enzyme active site. By blocking the active site, DCD slows the conversion of ammonium to nitrate preventing loss of nitrates.

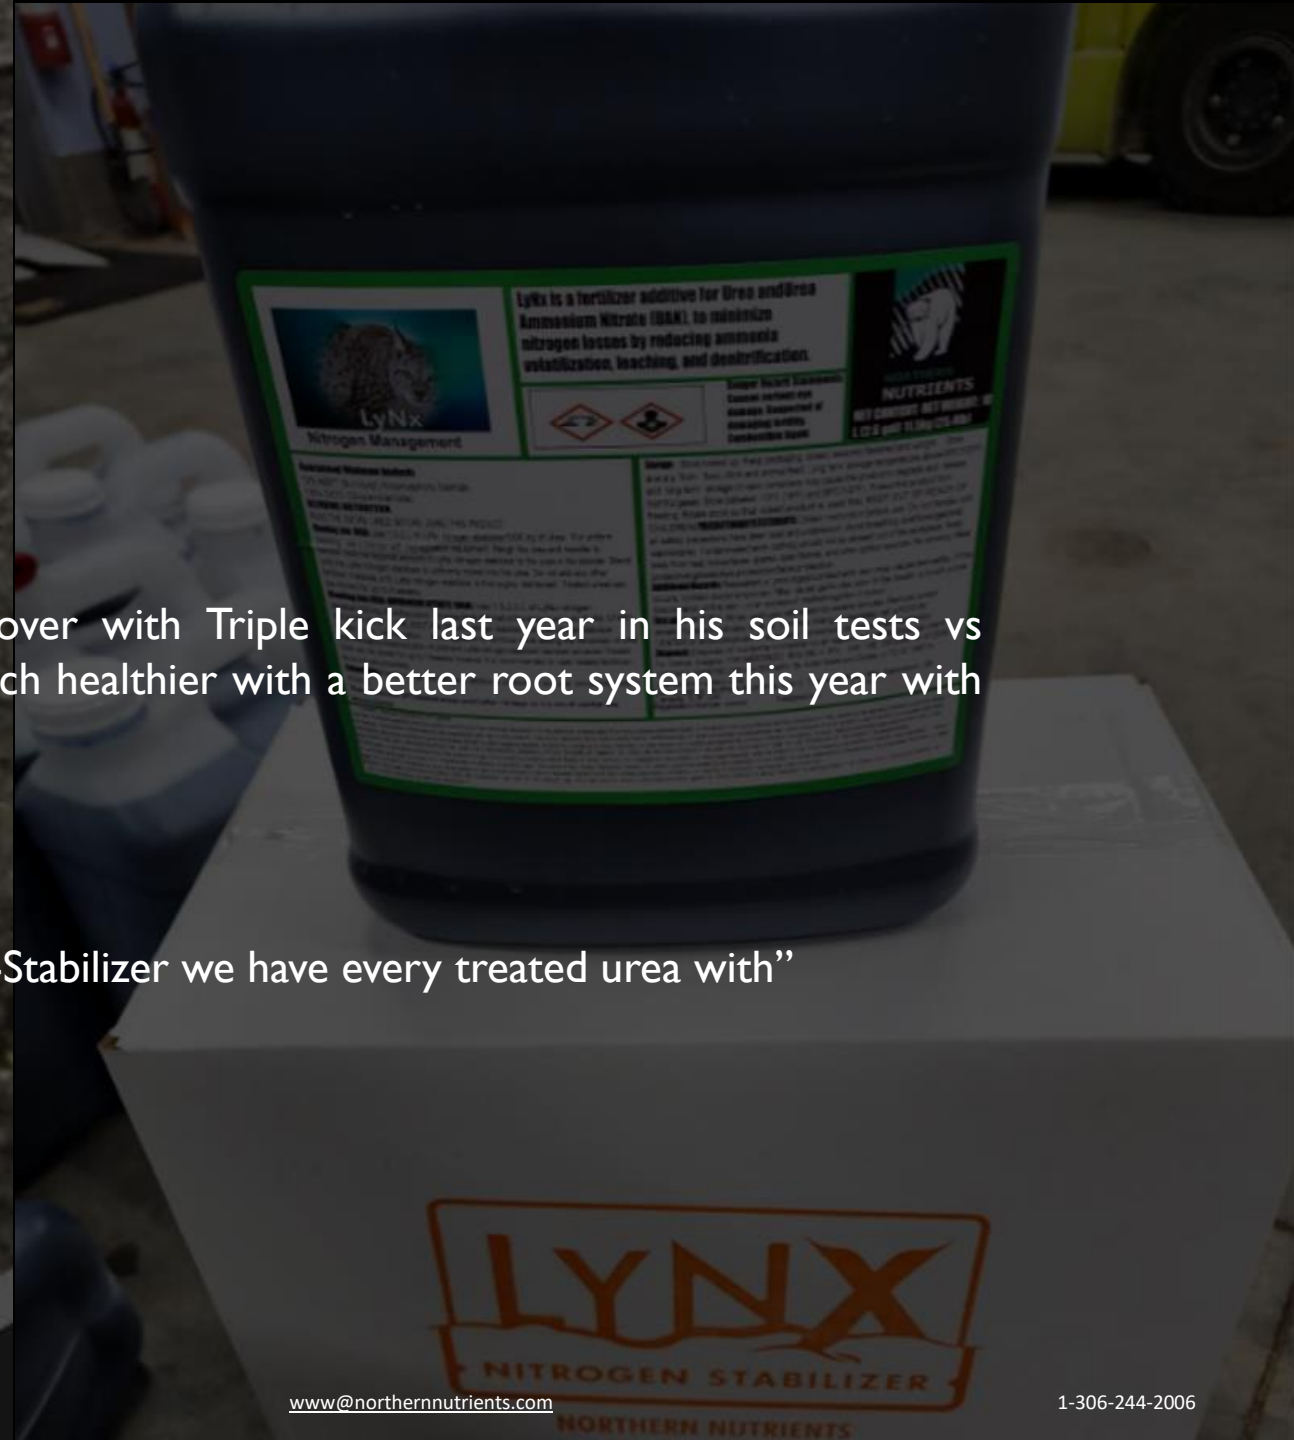

TESTIMONIALS

“First my neighbor had twice the N left over with Triple kick last year in his soil tests vs untreated, and now our wheat is looking much healthier with a better root system this year with Triple kick we used this year”

~ Travis Declerq, Watrous, Sk

“Was the easiest to use and fastest drying N-Stabilizer we have every treated urea with”

~ Central Saskatchewan retailer
